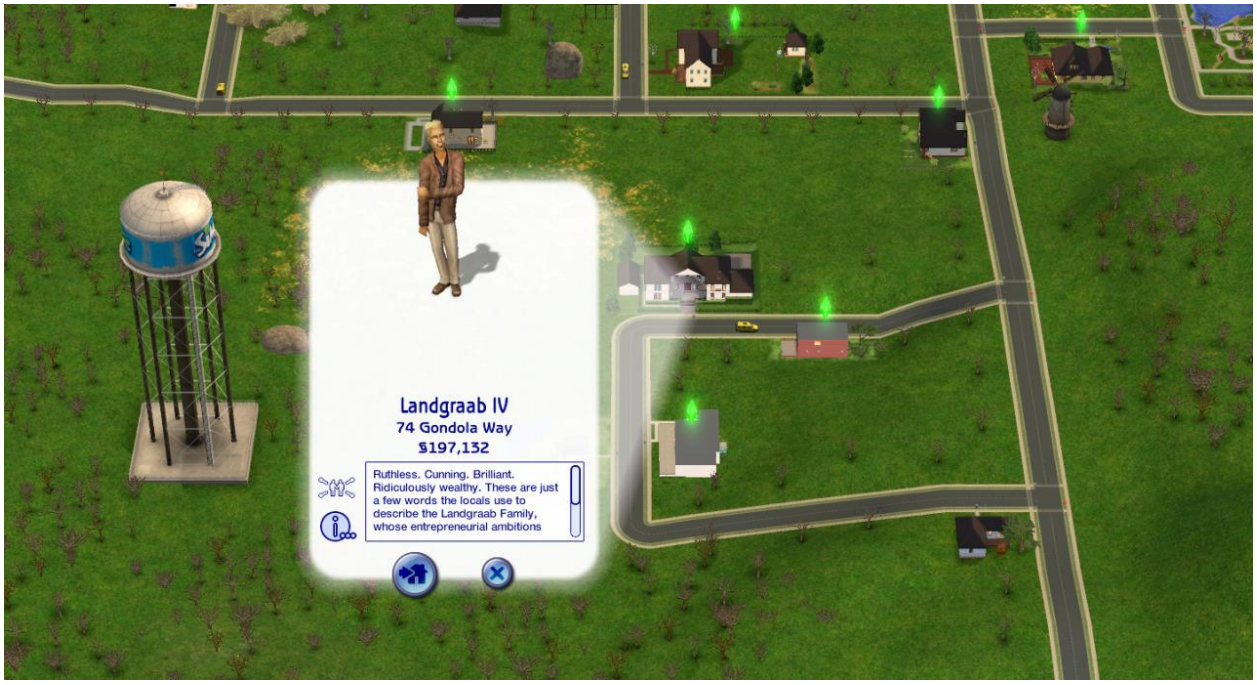
7 - Landgraab – Round 1



Landgraab IV
74 Gondola Way
$197,132
Ruthless. Cunning. Brilliant. Ridiculously wealthy. These are just a few words the locals use to describe the Landgraab Family, whose entrepreneurial ambitions

Welcome to another iteration of my half Uberhood. Today we are with Malcolm.

I got him a car as his house comes with a garage and without wasting time he made it to his electronics store

And apparently, Mallory the girl who Don met on his last day works here. She has a lot of skills but none is really an interest to Malcolm as he needs someone who can work the register.

Congratulations! This is the first Simoleon earned by Malcolm from Electronics Supercenter. It has been placed in Malcolm 's inventory. Display this award with pride for all to see!
Earned $100,000
(Malcolm Landgraab IV)
I've earned more than any Sim I ever heard of! Just call me Moneybags!
Wants
Fears
Memories

Running the store is going a lot easier then the bakery. It also helps that Malcolm has more of a talent in making a sell where as Denise would just argue with customers xD

I spot the most famous Sandy Bruty. Loving the hot pants!

Around 4 or 5 he closes the store and makes his way to the Club Dante. Now, I want to get things and change it up a little bit around here but need to see how much money this place can earn first. And also look who came here on the first day 👀

You guys must know of this picture. Because of that I always thought of Nina to be Malcolm's first so he will pursue her as he already has a wish to ask someone on a date.

Next day he had a wish to jump rope and what do you know fitness is his one true hobby. I was already thinking about him having a gym as his 3rd asset and this just confirmed it.

uh... ma'am you seem to have misplaced your face...

so she got a pink face after I gave her the uniform, meaning I loaded the thumbnails for a bunch of new cc.

-I'm sorry Mallory but you're scaring the customers. I'm afraid I must let you go.

oh, god... it's pink... it's pink everywhere. This reminds me; there was a post in tumblr making the rounds that showed someone found the texture for the pink flashing. Has anyone made a default replacement for it? It sounds like something we would do as the sims community xD

I reloaded the game and it seems like it is the teens' night at Club Dante. The reporter was also there but he didn't write a review.

I removed the tables and the bar from this room and added a billiard table, this table and a gambling table. Which also meant Malcolm had to let this guy go as well. He will hire someone eventually so they can be promoted to a manager if I want to expand his business but for now I'd like to see if he can make a decent profit.

I also got this guy for the outside because I never see them around in lots as I never play with the newer expansion worlds.

Also we have a university dude for the register. I'm guessing he is from university because he has that goofy walk. He has no skills so he asks for very little and he will eventually learn to get better with the register.

He fails the sale often too but he can still profit here. Also as you can see I mixed it up a little with the electronics.

He didn't go to the club and instead took the night off to have a little fun ~~and maybe meet Nina again.~~

Nina wasn't around and the waiter dropped the food all over him

But at least he met Zelda Mae. This means nothing to you guys but in one of my saves him and Zelda were the most adorable couple.

What do you know, Zelda calls him the next day to chat. I'm sad that they don't have the same chemistry from the previous game but if the same things happened every time why would we play it over and over?

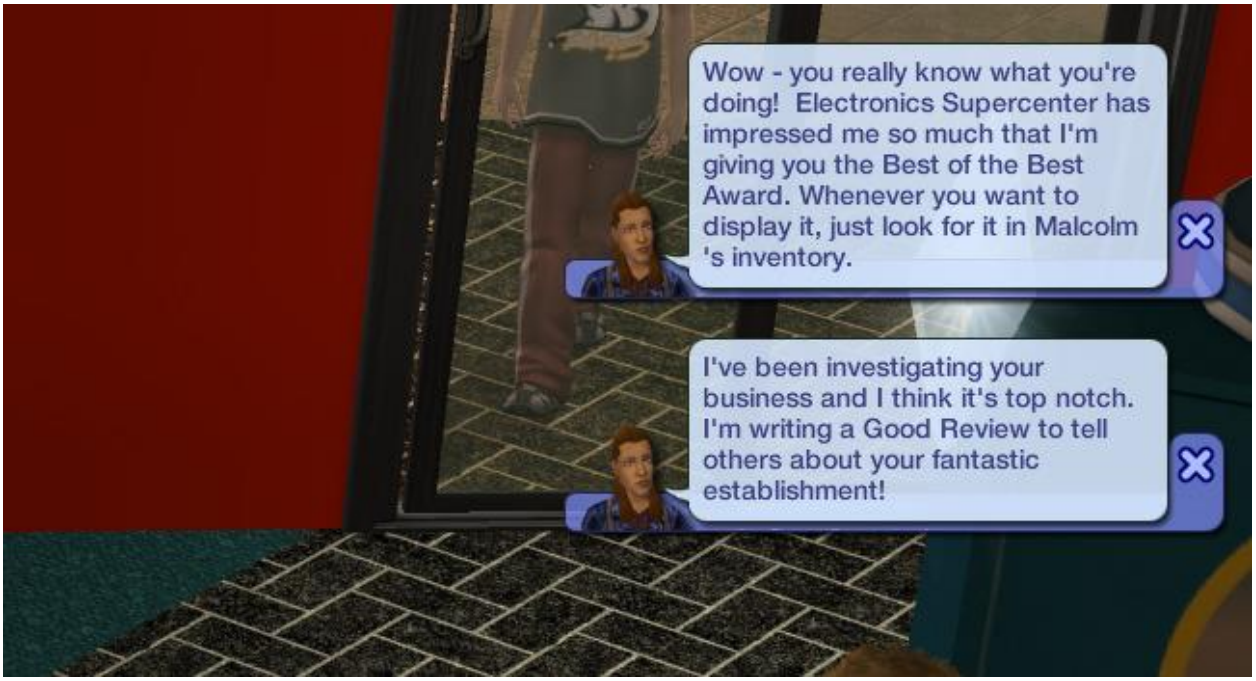
Congratulations! Your business is now Rank 3 and you have gained a point to spend on Business Perks. Click on the Business Perks button on the Business Tracker and choose your new perk!

And here are his perks. I gave him the assess mood thing because I was curious about how it worked. The store is doing well. The cash flow is still in minus because I spent some money to buy some things but every day the profit thing is in the green.

It seems like it is Veronaville night at the club tonight.

They have a very low relationship but I thought I'd give it a try anyway xD



Wow - you really know what you're doing! Electronics Supercenter has impressed me so much that I'm giving you the Best of the Best Award. Whenever you want to display it, just look for it in Malcolm 's inventory.
I've been investigating your business and I think it's top notch. I'm writing a Good Review to tell others about your fantastic establishment!

Next day he got the reporter but unlike Denise he got what he wished for a good review and a best of the best award. What can I say other than, he was born to do this

Nina must have gotten the news already. But in reality, he just spent some time talking to her on the phone when his social was low at the club and it pushed their relationship to 30 which was apparently enough for her to agree to a date.

I don't know what happened here enough for me to take a picture but I like it so it stays xD

Ah, finally Malcolm getting his first kiss

And she already wants to make out with him xD Their relationship isn't even high enough for the option to appear but that's what ACR is for.

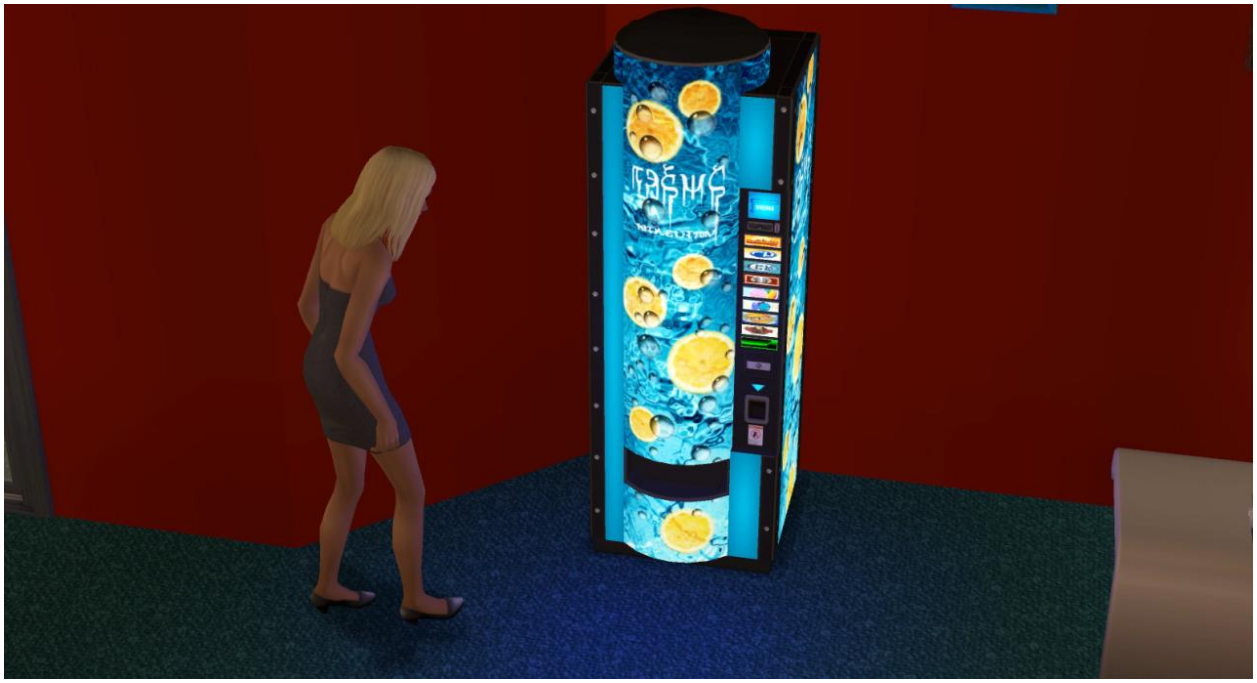
A great date! Pretty good considering their relationship level and how late it is.

Sooo, he has a bit of an obsession on Mallory it seems. I cancelled an ACR caress thing right before he was about to lay her off, too xD that would have been awkward. It gave me so much of Chandler and Nina energy (a youtube link) xD

Malcolm has realized that a lot of empty shelves make even a ritzy boutique look like a fly-by-night flea market. That kind of insight wins a Bronze Stocking Talent Badge!

He already has the golden sales badge and now has bronze restocking, as well. Good job!

On his last day, here we have Dina. She has come to the store on opening and spend some time over at the soda machine, eventually making the important decision of drinking a soda. Then she came over here and thought about chips and decided to get one.



And she went back to the soda machine to contemplate a little more xD

Hi, I'm Brandi! Since my friend Nina had such a great time with you the other day, I thought I'd see if you wanted to go Downtown?
Yes
No

Oooooo, Brandi needs some action!

But not before I recreate this iconic picture!

And as my machinations came to pass, Malcolm is free to date whoever he wants next xD

Wow, that was about the best time I ever had with ANYBODY!!! I REALLY want to go out with you again! Please, oh please, oh pleeeeeease? I can't wait to tell all my friends!

With this dream date ending we finished up at his household. I tried to call Brandi the next morning until the season turned to winter but she was at work. I hope he can catch her before that blue tinge runs out! I don't know when I'll get to it though as there are many families I must play.

8 - Curious Brothers – Round 1

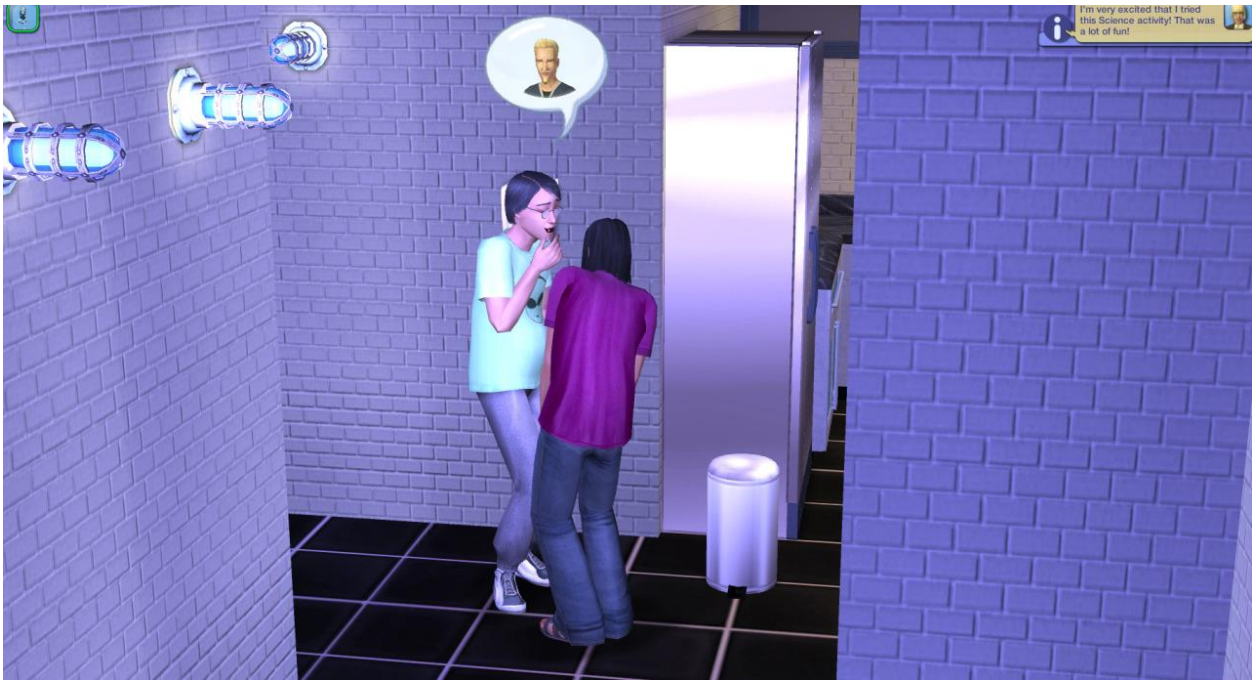
Curious
2 Cover Up Road
$102,921
In search of truth and mystery, the Curious brothers got more than they were "expecting." Can Pascal, Lazlo, and Vidcund cope with their new roles as cosmic parents?

Sooo, I have over 90 pictures from this round. They are a crowded family of adults and have a lot going on. This will probably take 4 parts! These guys used to be my favourite household because they were all so nerdy.

The reason why I no longer say they're my favourite is Pascal is reminds me of my ex

Community sweetheart Vidcund reminds me of someone who failed to even become an ex! I'm still friends with this person and like our ol'Vidcund here he is hot.

Here is Lazlo in his ~~weed~~ garden.

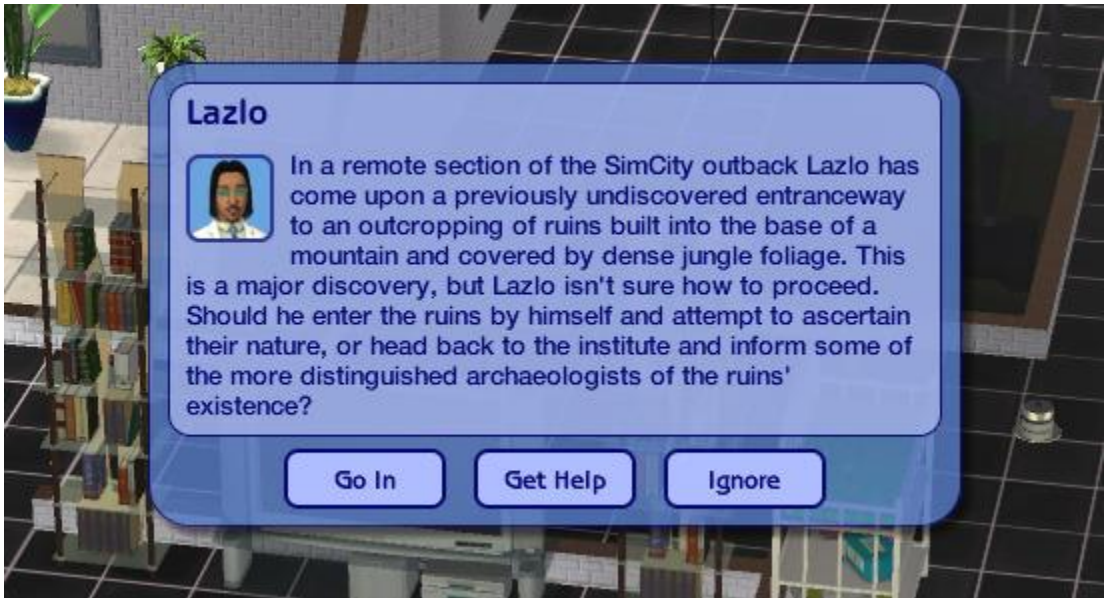


Brotherly bonding, shit talking Loki xD

Alright, first alien baby! And I've done the math and this baby is the first child that is born into the town. Brandi is the only other person who starts out pregnant but she is in her 1st trimester so baby curious is still the oldest.

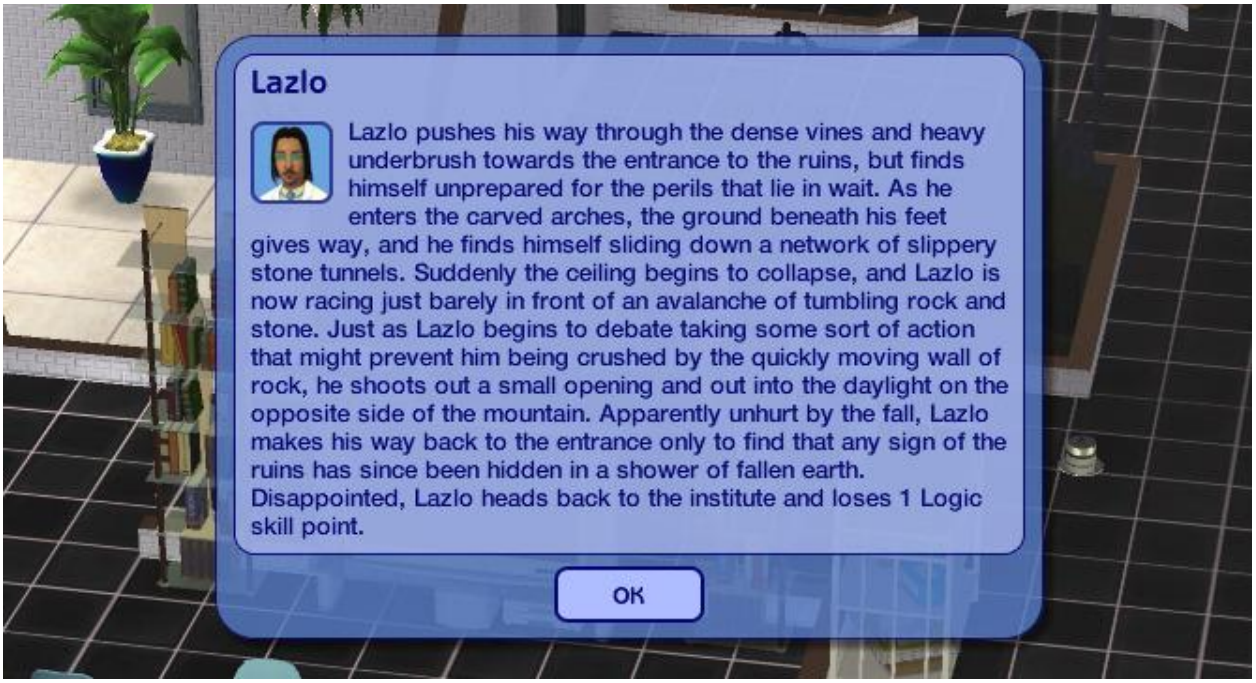
I watched the cinematic for this one because I love it :D And we have a baby girl! I named her Cassiopeia because there is a supernova named Tycho in this constellation and it's long been my tradition to name this baby Cassie if it's a girl.

Uncle Lazlo on duty! Pascal was very tired so he went to sleep, right after the birth.



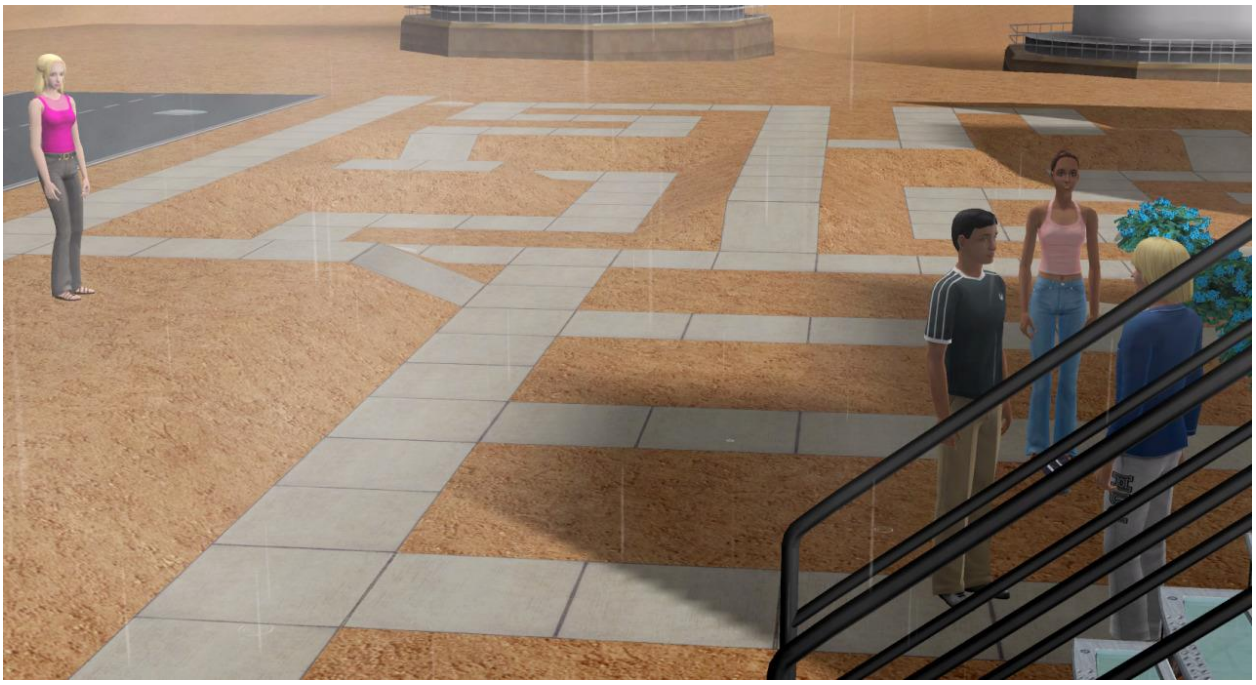
Lazlo
In a remote section of the SimCity outback Lazlo has come upon a previously undiscovered entranceway to an outcropping of ruins built into the base of a mountain and covered by dense jungle foliage. This is a major discovery, but Lazlo isn't sure how to proceed. Should he enter the ruins by himself and attempt to ascertain their nature, or head back to the institute and inform some of the more distinguished archaeologists of the ruins' existence?
Go In
Get Help
Ignore

Well, his last name is Curious. I think he would just go in. I don't think Lazlo has the patience to go back and get help.

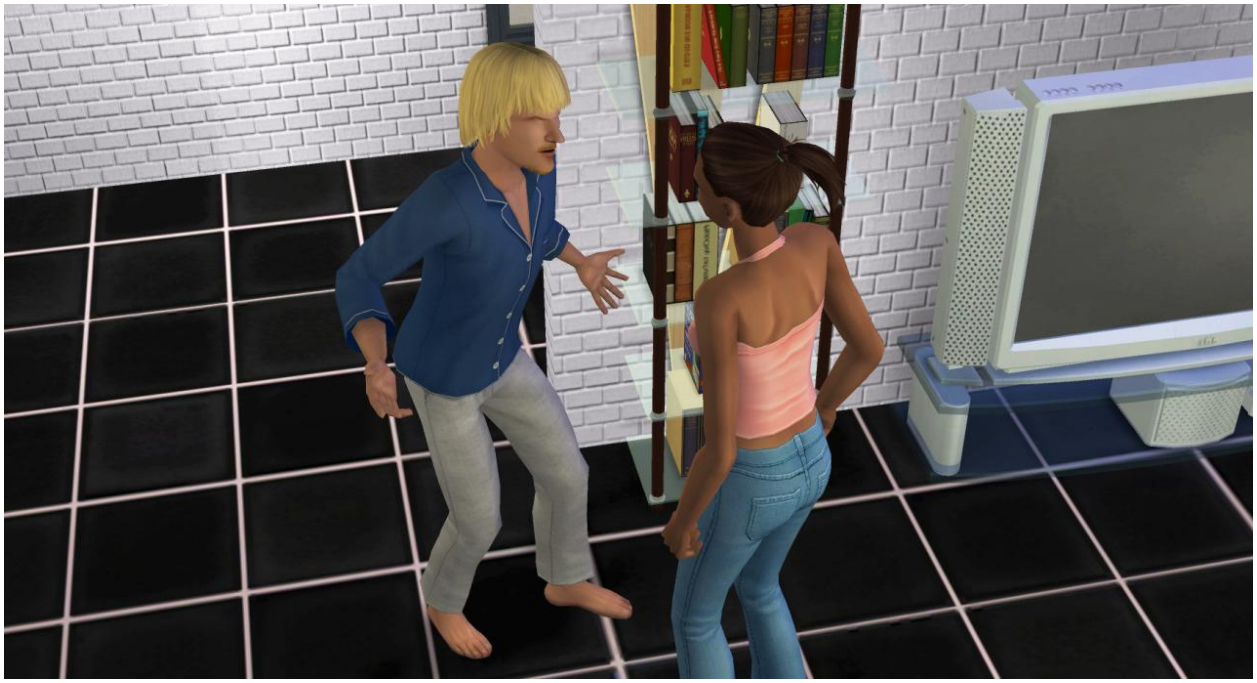


Lazlo
Lazlo pushes his way through the dense vines and heavy underbrush towards the entrance to the ruins, but finds himself unprepared for the perils that lie in wait. As he enters the carved arches, the ground beneath his feet gives way, and he finds himself sliding down a network of slippery stone tunnels. Suddenly the ceiling begins to collapse, and Lazlo is now racing just barely in front of an avalanche of tumbling rock and stone. Just as Lazlo begins to debate taking some sort of action that might prevent him being crushed by the quickly moving wall of rock, he shoots out a small opening and out into the daylight on the opposite side of the mountain. Apparently unhurt by the fall, Lazlo makes his way back to the entrance only to find that any sign of the ruins has since been hidden in a shower of fallen earth.
Disappointed, Lazlo heads back to the institute and loses 1 Logic skill point.
OK

oops, oh well.



Not related part of Singles and Ajay has come to welcome them to the ‘hood!



Cundest of the cunds Vidcund is having an argument with Kristen xD

What the...?? Ajay just came up from nowhere and kissed Erin!

Lazlo gets in there to have a chat with her. They are getting along well!

Holy hell, Acr xD

Lazlo checked the girls out and he has one bolt with Erin so him and Ajay are basically fighting over her affections xD

hahahaha, in the fucking same place xD

Ajay is not out of the fight yet!

And he takes things to another level xD

Erin got a crush on Ajay now. Really E, from a butt grab? That did it for you?

I think someone wants to be boned by the town casanova

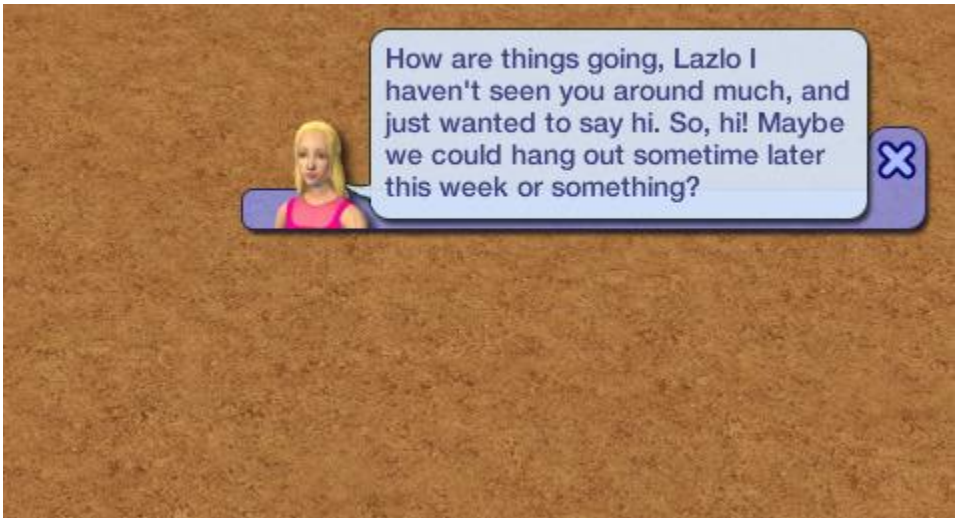
Behind the wall we have Gieke and Nervous getting along. Redhead came to visit the Curious boys, it must be the nerd signal they have up that he saw and Nervous was here because Pascal invited him over.

Okay, this is adorable. Two shy sims trying to flirt. I might go play Chester to see where this would go 👀I normally have Nervous move in with Olive but that happens after they build a relationship and he might just move to Downtown (where Chester is) instead. I think he had enough of the desert.

Next day, Vidcund wished to buy new clothes and I took him outside.

I still need more cc but I like this for now.

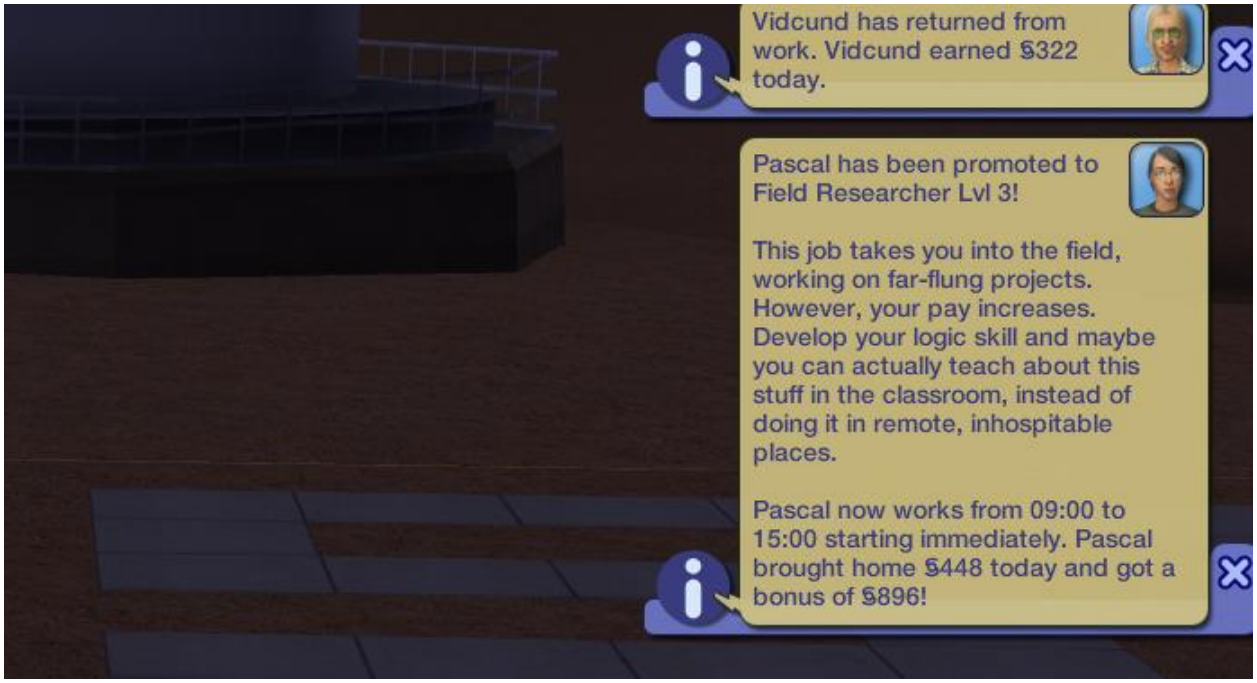
I also gave him a new haircut



How are things going, Lazlo I haven't seen you around much, and just wanted to say hi. So, hi! Maybe we could hang out sometime later this week or something?

Oh, look who just texted Lazlo... and he has a wish to ask someone out on a date!

She doesn't even care that he has literal stink fumes coming off of him



Vidcund has returned from work. Vidcund earned §322 today.
Pascal has been promoted to Field Researcher Lvl 3!
This job takes you into the field, working on far-flung projects. However, your pay increases. Develop your logic skill and maybe you can actually teach about this stuff in the classroom, instead of doing it in remote, inhospitable places.
Pascal now works from 09:00 to 15:00 starting immediately. Pascal brought home §448 today and got a bonus of §896!

Pascal got a promo but Vidcund is lacking a few skills still

Okay, Lazlo is officially smitten with Erin xD

Their wishes ran out and they both wanted to dine out so I sent them to FM. Which was apparently enough for Erin to catch some feelings too :D

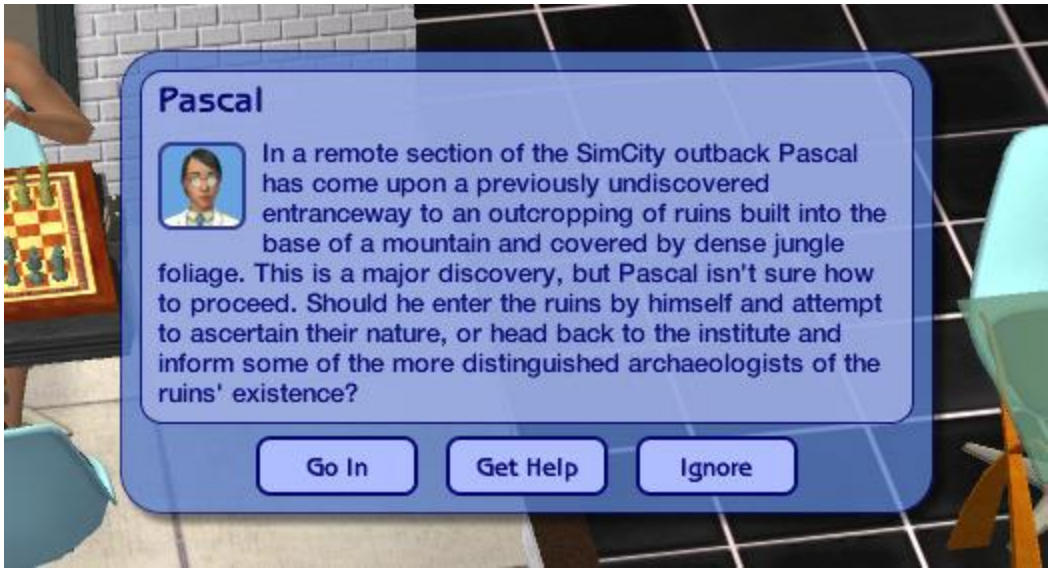
I had no idea they could have a fear of having their picture taken with someone else.

Unfortunately for Erin I had already pressed the button, sorry!

It didn't take them long to take things forward either. Erin is moving as fast as a romance sim would

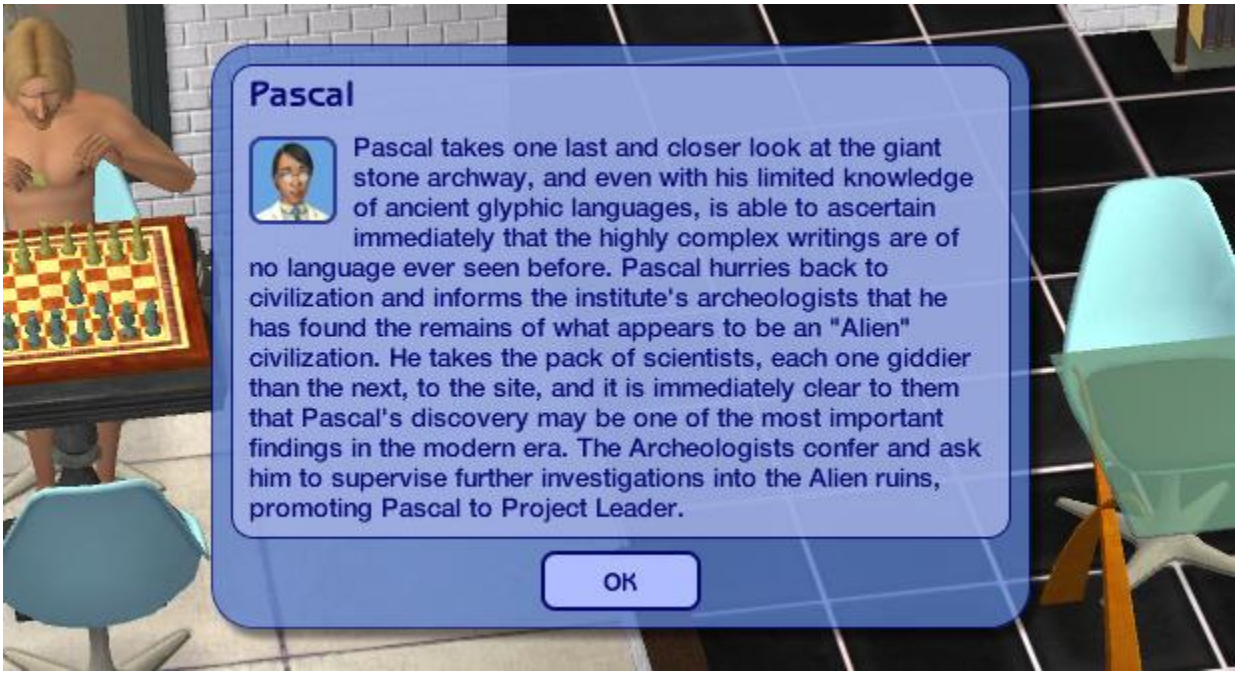
Lazlo wanted to ask her back home and she agreed.

But he chickened out when they made it back and haven't wished for more than flirt and I ended the date. They were tired



Pascal
In a remote section of the SimCity outback Pascal has come upon a previously undiscovered entranceway to an outcropping of ruins built into the base of a mountain and covered by dense jungle foliage. This is a major discovery, but Pascal isn't sure how to proceed. Should he enter the ruins by himself and attempt to ascertain their nature, or head back to the institute and inform some of the more distinguished archaeologists of the ruins' existence?
Go In
Get Help
Ignore

Pascal is older than Lazlo and I think he would do the smart thing and go get help.



Pascal
Pascal takes one last and closer look at the giant stone archway, and even with his limited knowledge of ancient glyphic languages, is able to ascertain immediately that the highly complex writings are of no language ever seen before. Pascal hurries back to civilization and informs the institute's archeologists that he has found the remains of what appears to be an "Alien" civilization. He takes the pack of scientists, each one giddier than the next, to the site, and it is immediately clear to them that Pascal's discovery may be one of the most important findings in the modern era. The Archeologists confer and ask him to supervise further investigations into the Alien ruins, promoting Pascal to Project Leader.
OK

Nice!

Pascal has been promoted to Project Leader Lvl 5!
It is up to you to manage a team of researchers in the quest for an important scientific breakthrough. Devise innovative experiments using your newly developed cooking and cleaning skills. If you really shine here, you may be on your way to becoming an inventor.
Pascal now works from 10:00 to 17:00 starting immediately. Pascal brought home $630 today and got a bonus of $1,260!

Unfortunately for him though, the promotion sent him home before he could pee. He had went to work with an almost full bladder thanks to the maid he couldn't make it to the toilet

This is your fault! Why are you laughing at him??

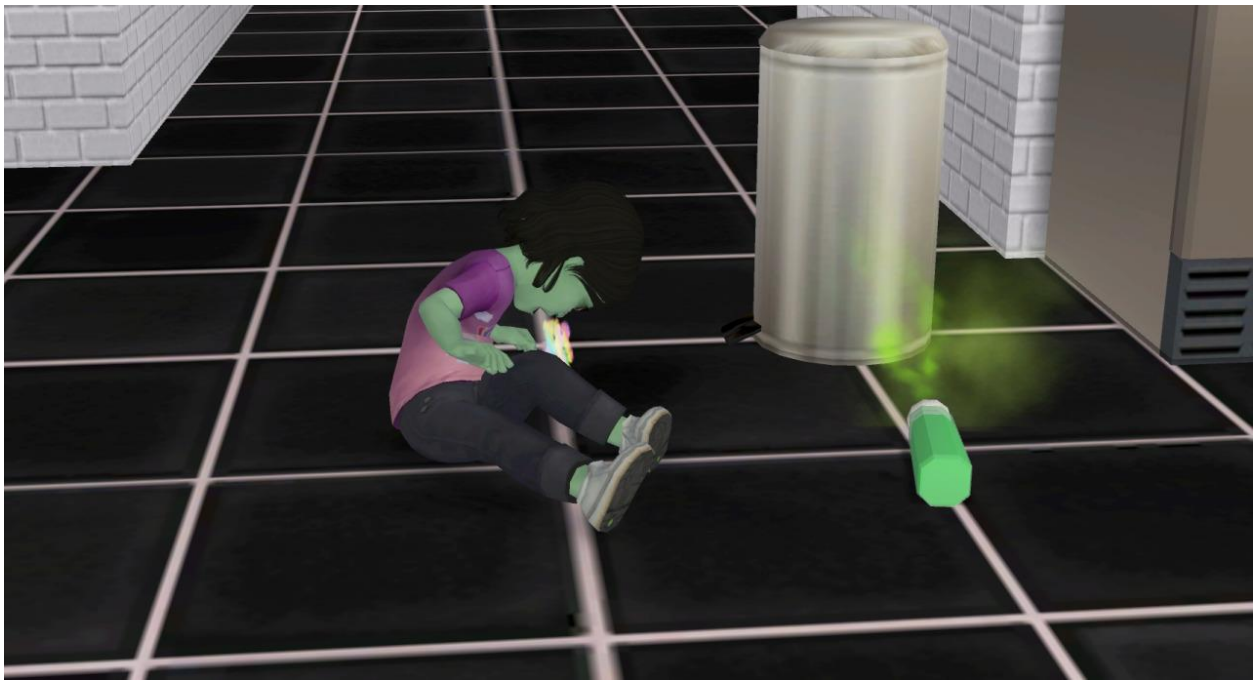
Apparently it is Cass' birthday already! They all fawn over her a lot and I actually remembered it was her birthday so why not have a little cake?

Asking attention from Uncle Vidcund as her first action as a toddler xD

Uncle Lazlo is taking her to the potty right after.

Well.... she is something xD I'm very curious (hehe) how she's going to look like when she grows up.

Kid, no xD

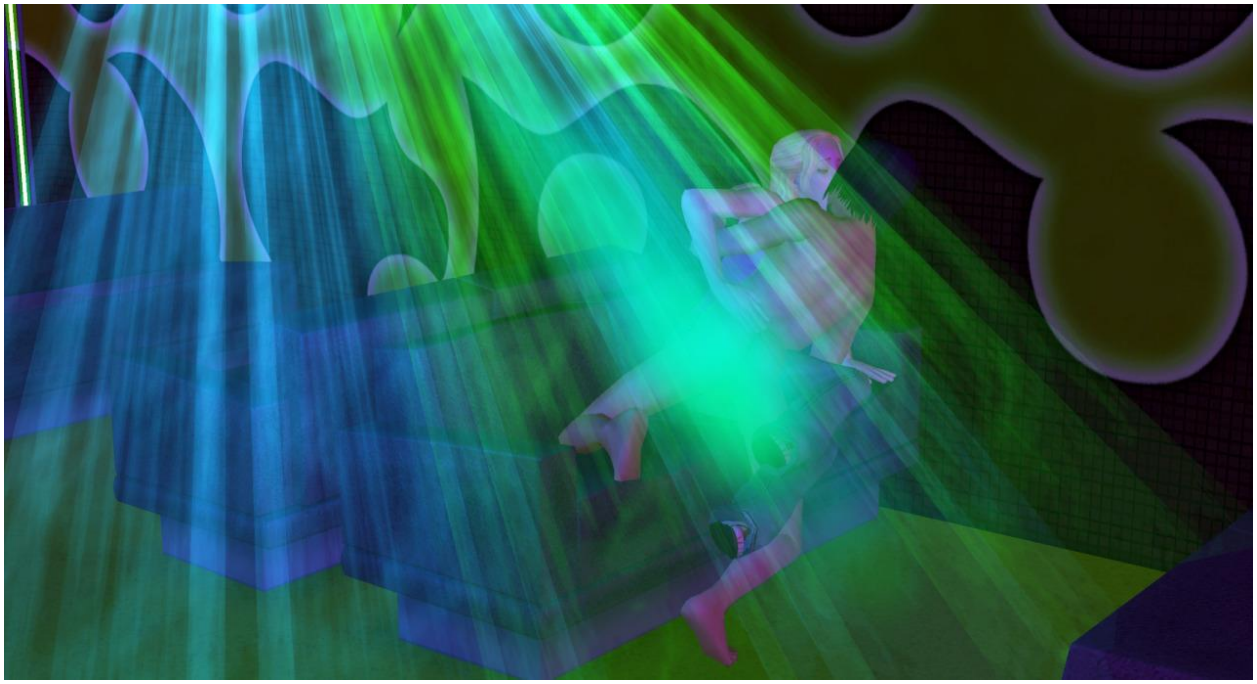


Pretty looking vomit at least xD

Oh, Erin wants more! Lazlo wants to go out again as well so....

There she is. Lazlo is gone! 2nd date and already in love.

Lazlo had a wish to woohoo her but I wanted Erin to roll it as well before I made it happen and she did!



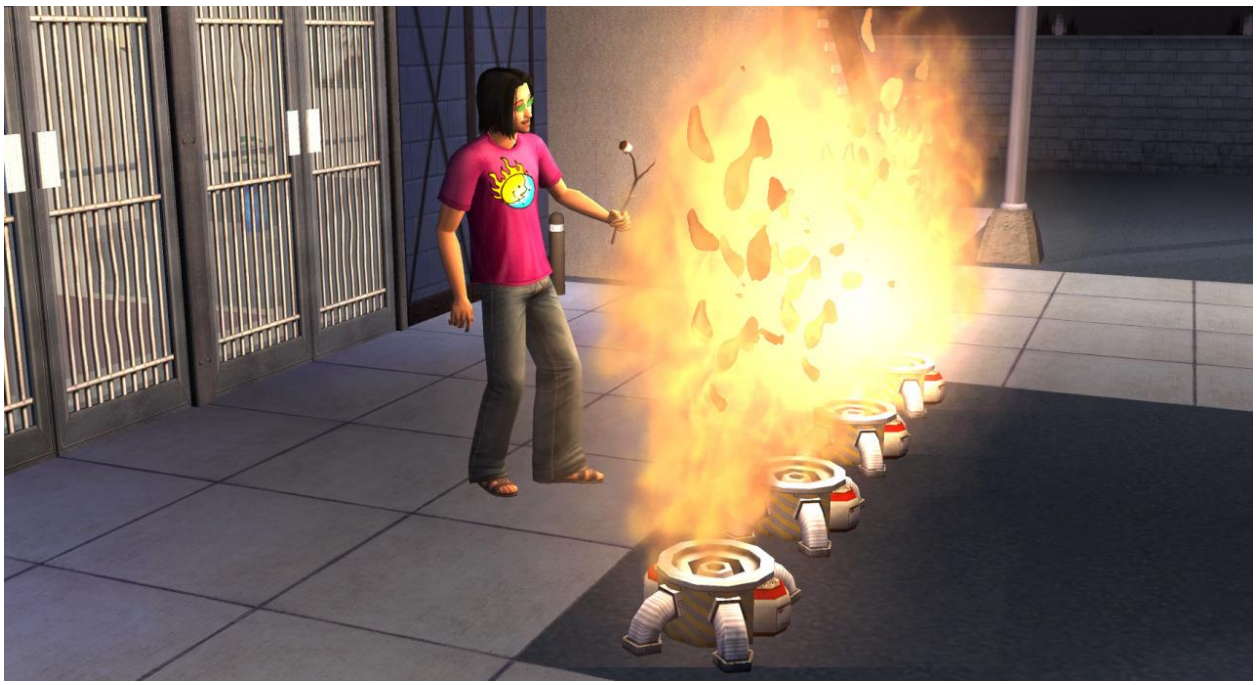
They are taking advantage of the empty lounge area.

Didn't know this would count as public woohoo - first woohoo in a public place, I admire the courage

As you can see, once is not enough. They wished to woohoo again xD

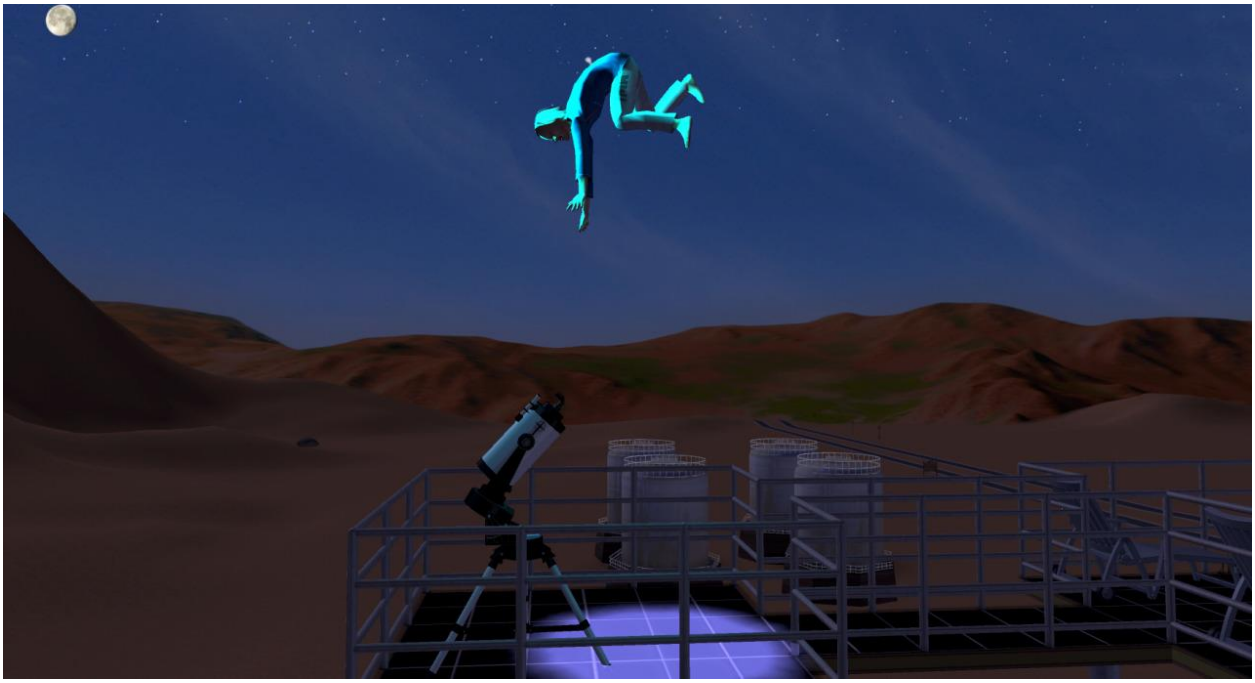
Damn, now they are done!

Lazlo rolled a want to get engaged to Erin but it was from the date thing so I didn't lock it in. It then rolled to this, can't say I ever saw that before.



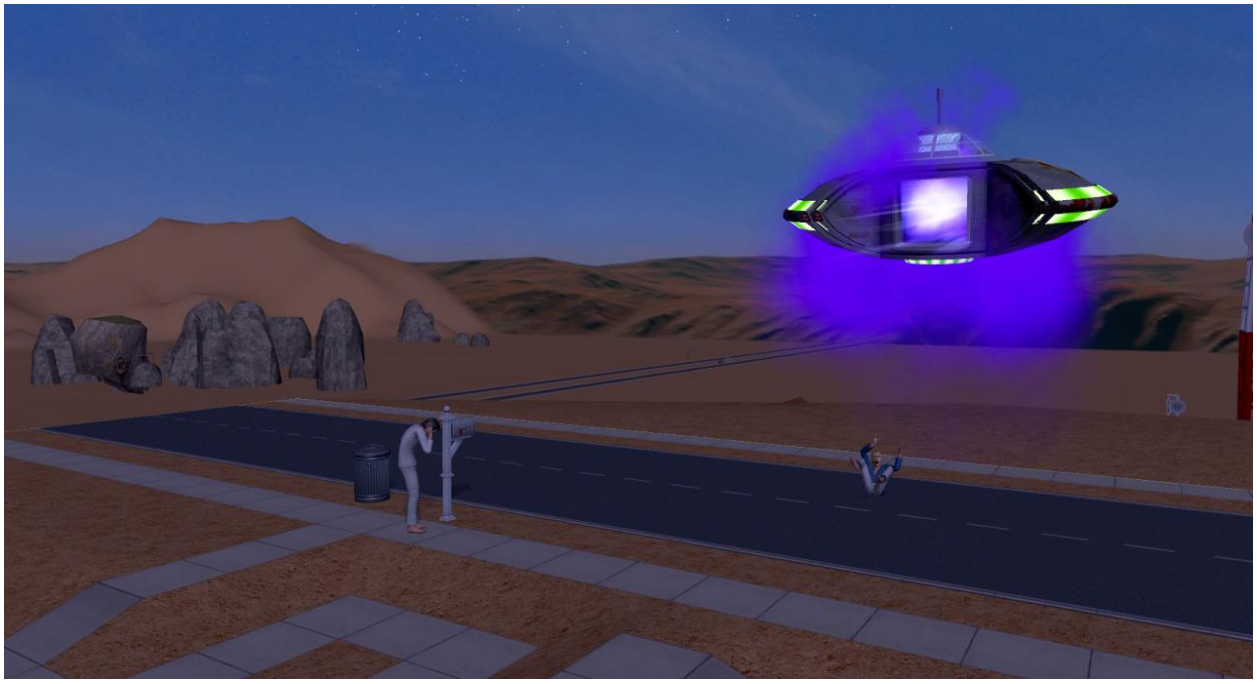
Woah, that looks sick AF. I love it!

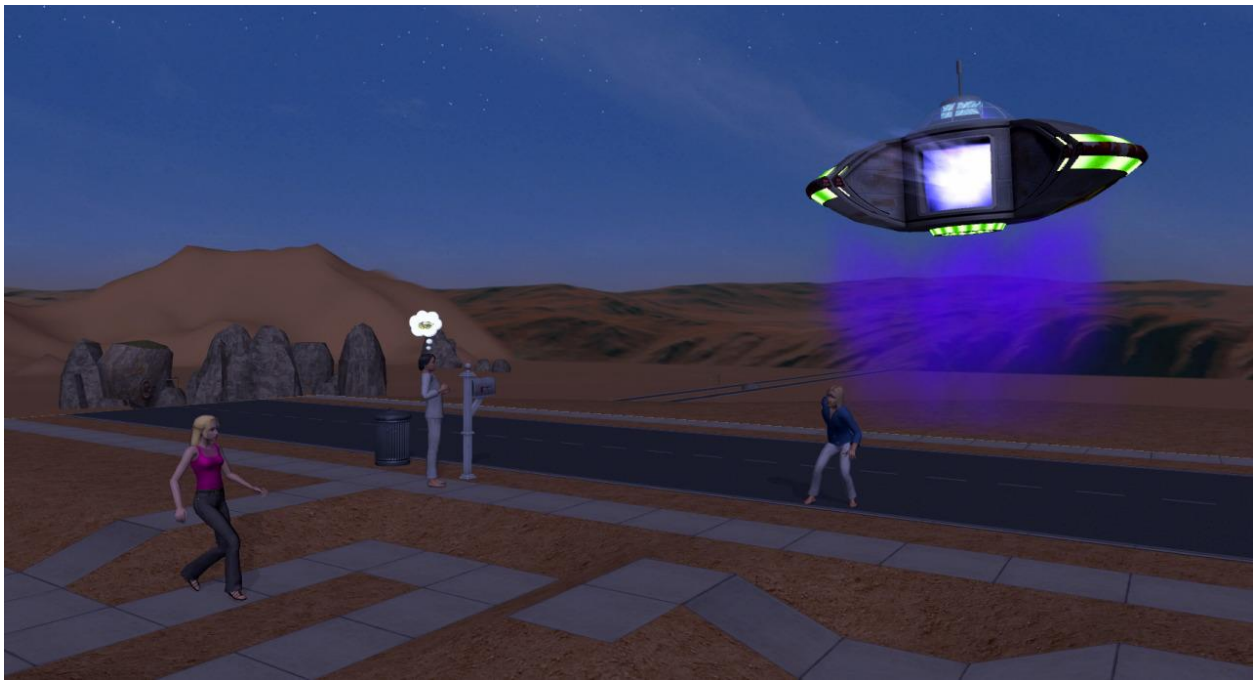
I was looking at something else when I saw a shadow move and then this thing appeared in their front door. I'm assuming Erin brought it, but not sure!



While I was busy trying to figure out who brought the tub Vidcund gets abducted! I know this is not a surprise normally but because this is a subhood the scripted events don't work. That's why he didn't get abducted that first night.

Waiting for Vidcund to get back





Erin was sneaking off from leaving a rose to their door this time

Oh man...

Vidcund quickly gathers from the events of the night by a read request from little Cassie

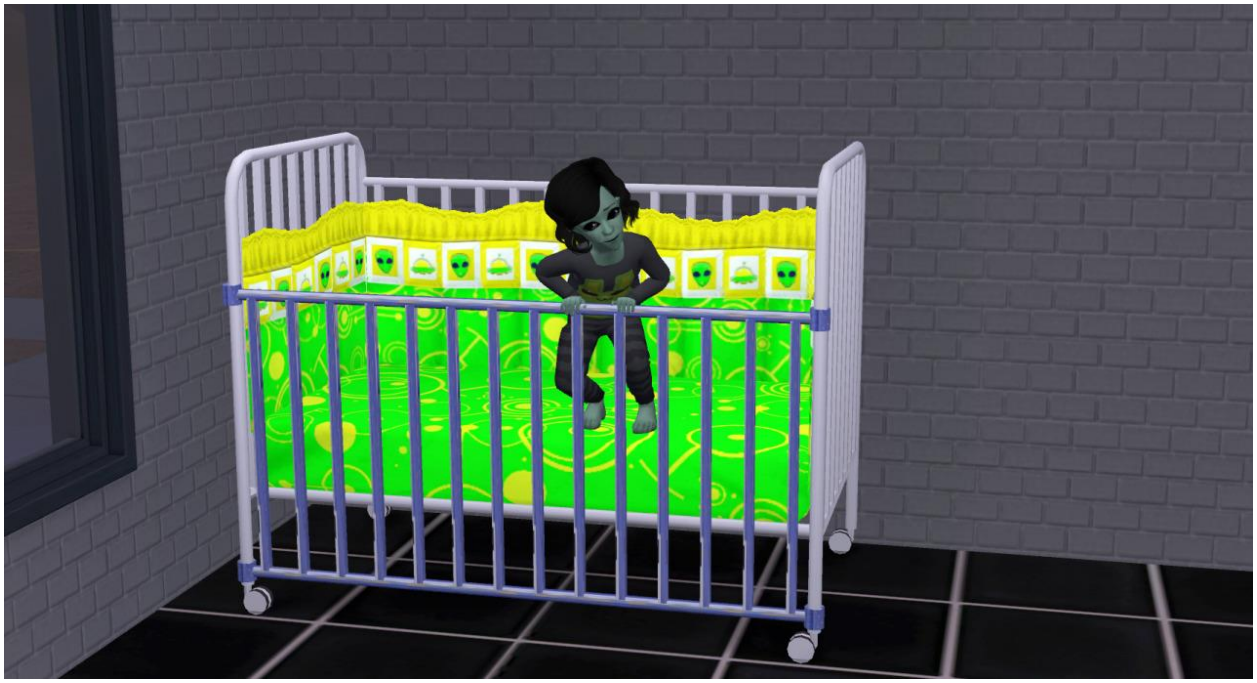
Whelp, looks like we're gonna have another cosmic baby with us in 3 days

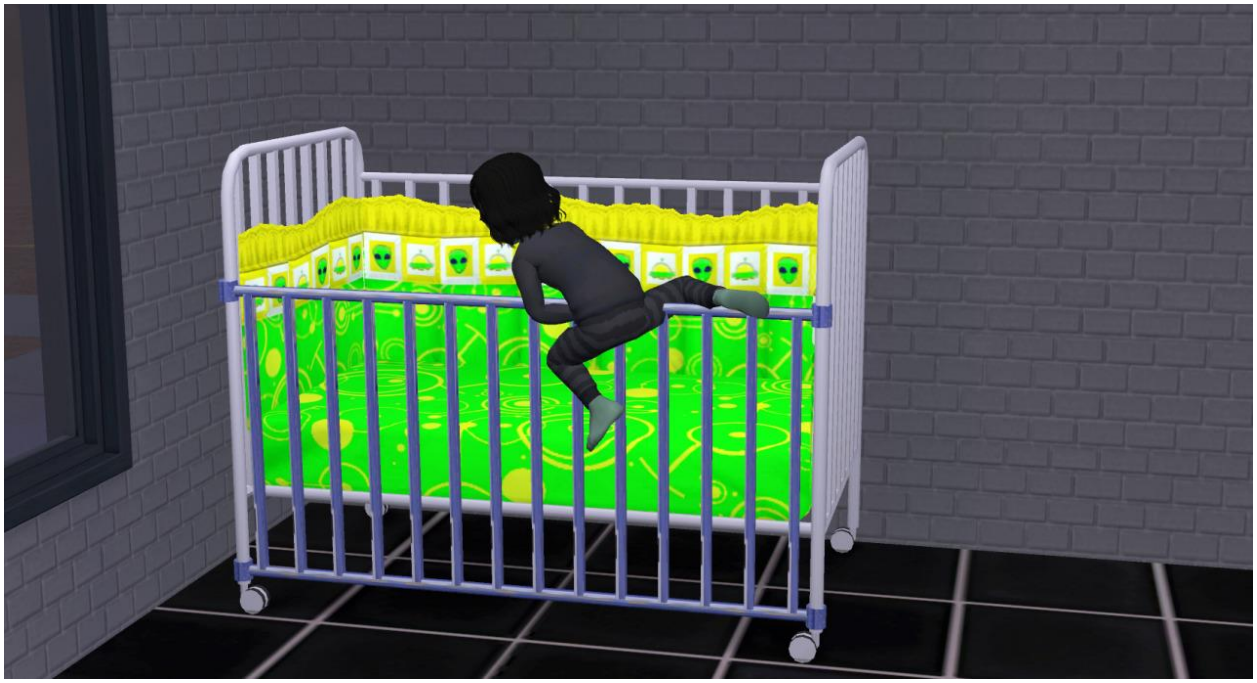
I called Erin over to fulfil Lazlo's (and hers) woohoo wants - and now Erin has fallen in love with him as well!

There is no place to place a double bed in his room but that's not going to stand in the way of their lust!

On the other side of the room, Vidcund have thought Cass to talk! Pascal had thought her to potty earlier, as well.

Oh he wished to get engaged to her again! I'm not going to do it until I play her household to see what she'll want but I locked it in.





Cassie escaping from her ~~cage~~ crib. They make a little giggle sound after it, too. I never noticed it before xD

Everyone is sleeping and there are no extra beds for Erin so she is enjoying the tub she brought over (I'm guessing)

Cassie asked for attention from her

And Vidcund got his bump!

lol, I forgot about this thing. Cass got a 200 check from PT I turned it off but I don't think there is a way to turn it off when they are pregnant.

You already met the aliens and carrying their memento xD Also both him and Pascal is mad at Lazlo because he pees during showers and they clean it up xD

I just realized that it'll be long as hell like this when I finally play the Singles xD

I asked Lazlo to invite Crystal Vu over. Her in game name is randomized and I hope I'll get to fixing those someday xD

Hi, Lazlo! Hey, did I ever mention to you that I work in a discount home furnishings warehouse? If your household ever needs to buy anything for your home, I'll make sure that your household gets it at a low cost.

Oh look at that, she networked with him. Cool.

The reason I called her over is in this picture. In my previous saves whenever I called her over to have a thing with Lazlo she always had better chemistry with Vidcund. In a previous save, Lazlo and she actually had negative chemistry but he is indifferent to her this time.

As he was busy looking all the way to Pleasantview to spy on Morty xD

They're having a little party over in Vidcund's room xD You guys he looks so much like my friend, I just can't 😂😭

I was going to get a cake for you! Why did you grow up. I thought your birthday was tomorrow xD

I realize I forgot to check her personality and she is a Beaker xD holy hell child, what is that psycho worthy personality. She has zero nice points too 😭

They were playing catch at dawn xD

And it's here!

Another baby girl! Who I named Andromeda as it is the name of the border constellation to Cassiopeia in the sky which also happens to be a feminine name.

With Andromeda's birth, we conclude our round here with the Curious boys!

9 - Gieke – Round 1

I don't think I played with OFB bin families before, ever. This will be the first time. Here we have Chester Gieke!

I have no idea why she's here xD She walked all the way from Strangetown to steal Chester's paper

He has a wish to obtain a pet and we have a stray here named Spot.

While he was busy getting along with the kitty the welcome wagon has arrived.

Aww, Nina complimenting Chester and he shyly accepts it. I like the shy animations so much. It really makes me like him

He got back to the kitty and Don and Nina are just going at it.

...

He is getting along really well with the kitty!

Yay, I think he is one of the only sims I have that was able to get a stray to the adopt point this fast.

Just the welcome wagon hanging in his room and ignoring him xD

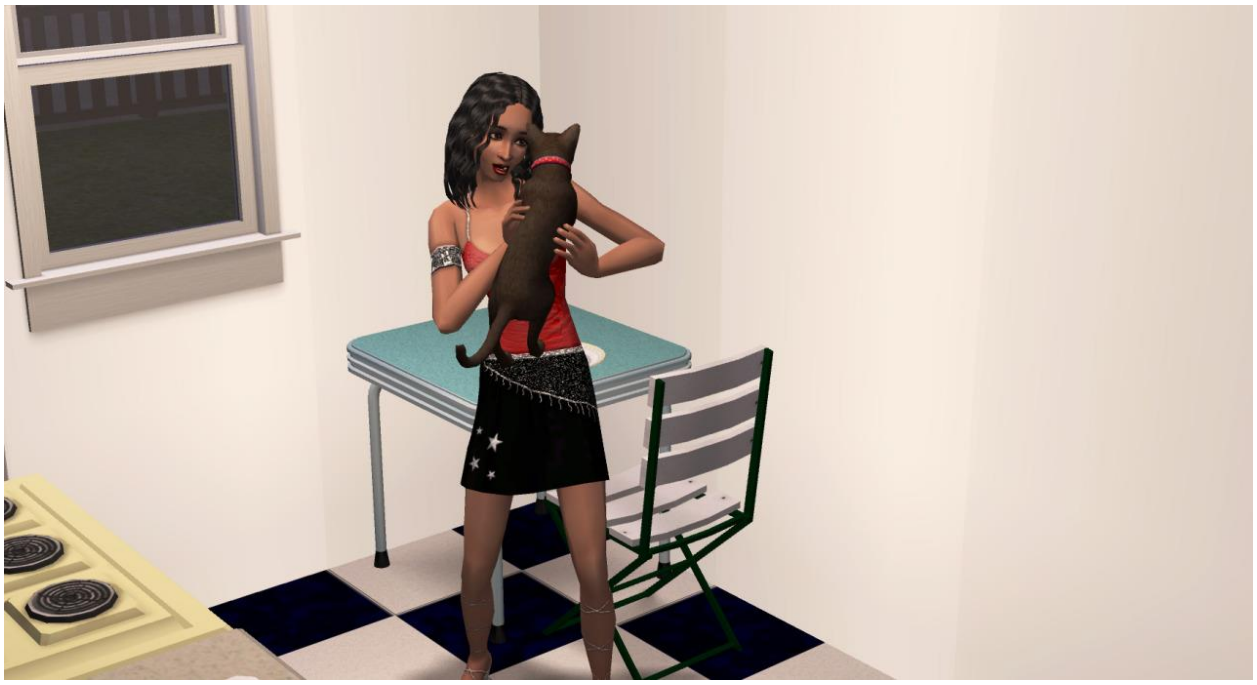
Spot is already took his place as the king of the household.

Cute!

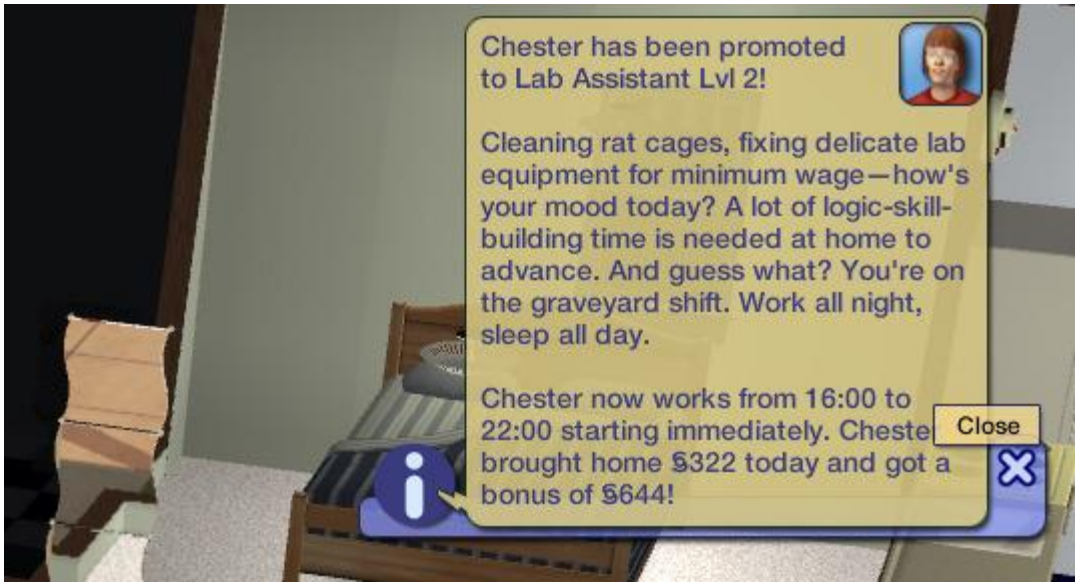
Online Job Finder
There is an opening in the Science career track as a Test Subject Lvl 1.
Hours: 11:00 to 17:00
Days: Monday, Tuesday, Wednesday, Thursday, Saturday
Pay: §217 a day.
Does Chester want this job?
Take Job
Look Again
End Search

He had wishes to get into medicine, gaming and science but I feel like he is a science person. It still doesn't feel right but I really don't like the Gamer career. Now that I'm writing this I think he might enjoy owning an arcade and since he came with OFB, that makes sense in my mind. I will get him to have an arcade when he has enough funds.

Thank you for keeping our yard clean, Circe!



Here is the hot downtownie @yakumtsaki nicknamed xD She is not only pretty and hot but also very smart as he brought her home from work! They got along really well and became friends, too!



Chester has been promoted to Lab Assistant Lvl 2!
Cleaning rat cages, fixing delicate lab equipment for minimum wage—how's your mood today? A lot of logic-skill-building time is needed at home to advance. And guess what? You're on the graveyard shift. Work all night, sleep all day.
Chester now works from 16:00 to 22:00 starting immediately. Cheste
brought home §322 today and got a bonus of §644!
Close

And he got a promotion

Look who is passing by!

He greeted him immediately

They started flirting in no time xD and we see Katherine sneaking past

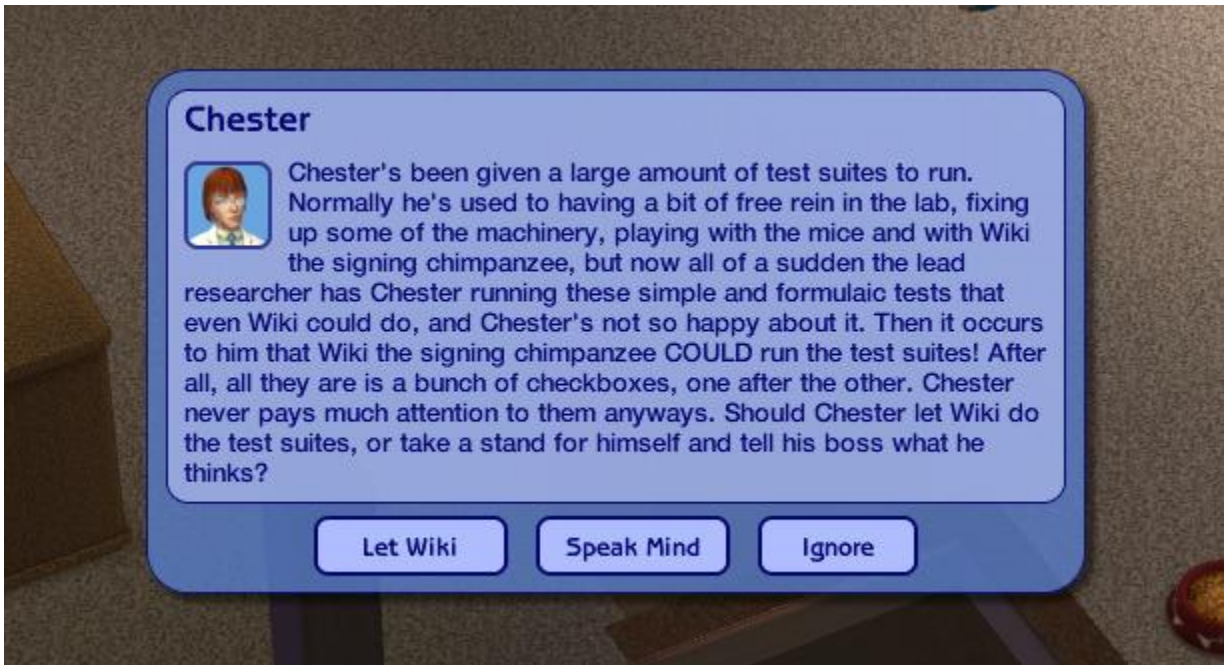
Nervous goes for the kiss so fast!

Oh, they didn't wait long did they xD

Cute

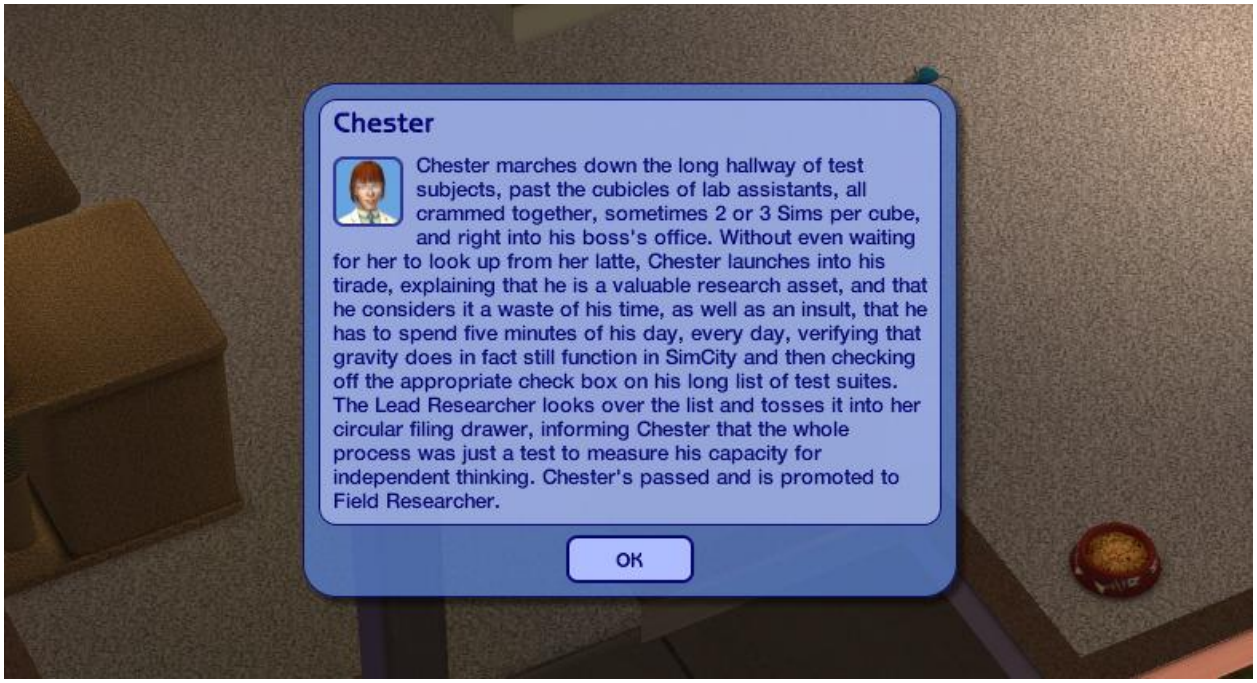
He didn't like the couch woohoo much, I guess.

I got a few toys for Spot and a mouse.



Chester
Chester's been given a large amount of test suites to run. Normally he's used to having a bit of free rein in the lab, fixing up some of the machinery, playing with the mice and with Wiki the signing chimpanzee, but now all of a sudden the lead researcher has Chester running these simple and formulaic tests that even Wiki could do, and Chester's not so happy about it. Then it occurs to him that Wiki the signing chimpanzee COULD run the test suites! After all, all they are is a bunch of checkboxes, one after the other. Chester never pays much attention to them anyways. Should Chester let Wiki do the test suites, or take a stand for himself and tell his boss what he thinks?
Let Wiki
Speak Mind
Ignore

I think he would speak his mind



Chester
Chester marches down the long hallway of test subjects, past the cubicles of lab assistants, all crammed together, sometimes 2 or 3 Sims per cube, and right into his boss's office. Without even waiting for her to look up from her latte, Chester launches into his tirade, explaining that he is a valuable research asset, and that he considers it a waste of his time, as well as an insult, that he has to spend five minutes of his day, every day, verifying that gravity does in fact still function in SimCity and then checking off the appropriate check box on his long list of test suites. The Lead Researcher looks over the list and tosses it into her circular filing drawer, informing Chester that the whole process was just a test to measure his capacity for independent thinking. Chester's passed and is promoted to Field Researcher.
OK

awesome

I do not remember why I took this pic. Oh, it's because Spot is a loud eater! It is so adorable. He makes noises when he eats his kibble and it actually reminds me of a real life cat I knew xD

Since he had a woohoo wish, I invited over the best candidate.

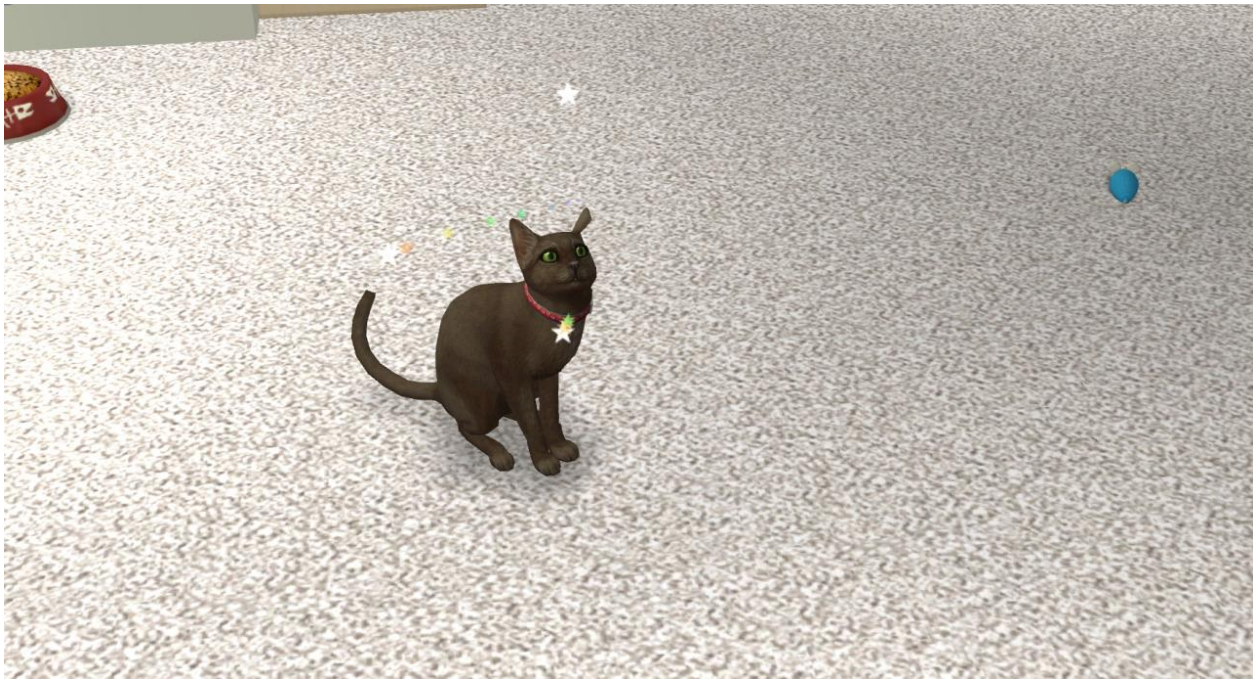
Aww, Nervous got a crush!

Chester got a crush as well!

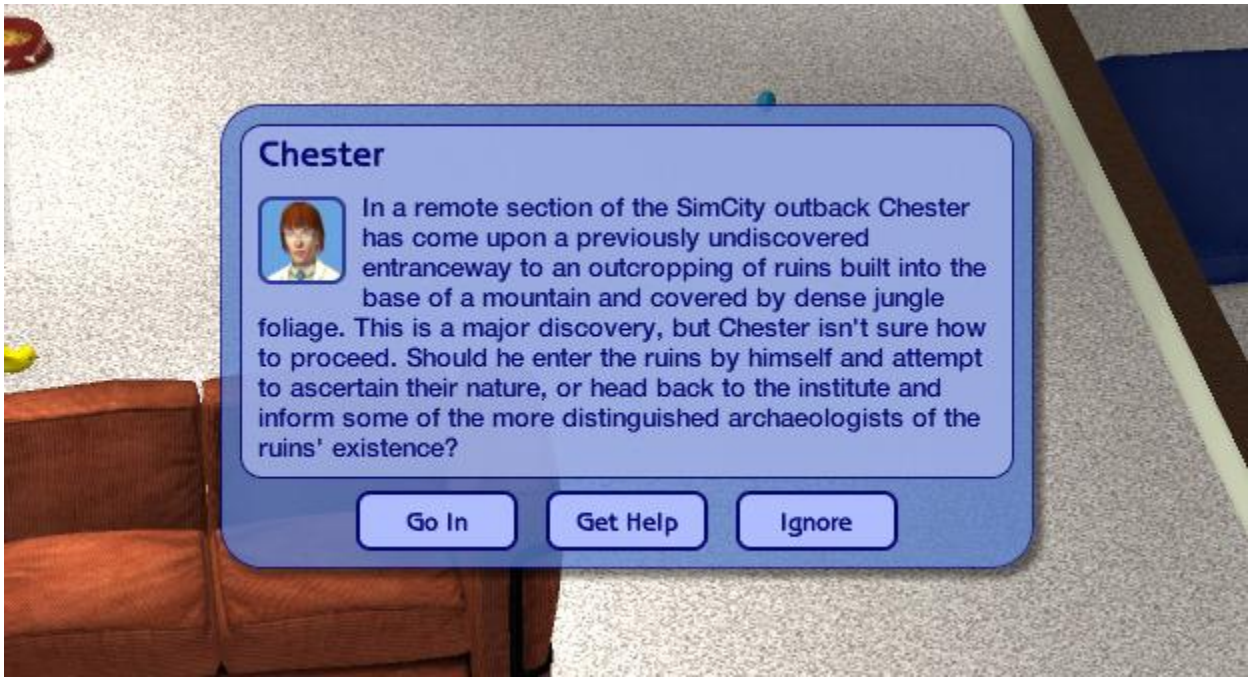
Time to pan the camera away xD

I got them into a date the next day and here they are pillow fighting.

They are having fun but sadly Chester was too tired and their wishes ran out.

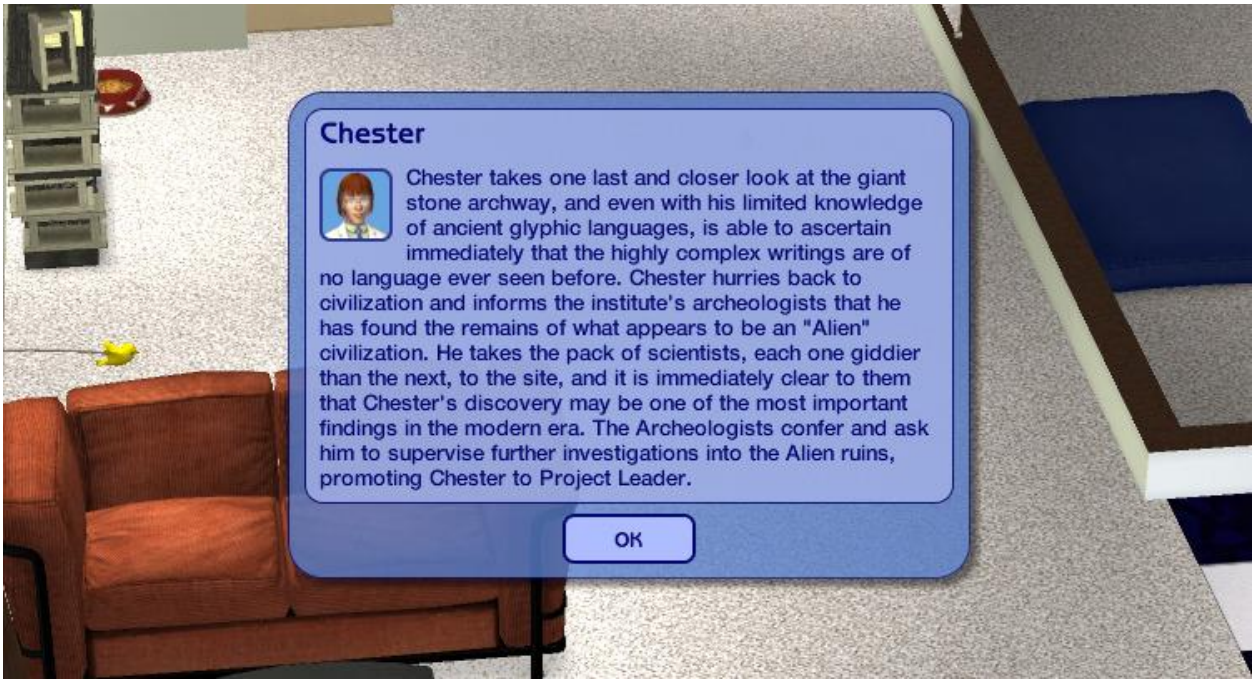


Meanwhile, Spot is tripping xD



Chester
In a remote section of the SimCity outback Chester has come upon a previously undiscovered entranceway to an outcropping of ruins built into the base of a mountain and covered by dense jungle foliage. This is a major discovery, but Chester isn't sure how to proceed. Should he enter the ruins by himself and attempt to ascertain their nature, or head back to the institute and inform some of the more distinguished archaeologists of the ruins' existence?
Go In
Get Help
Ignore

He'd definitely get help.

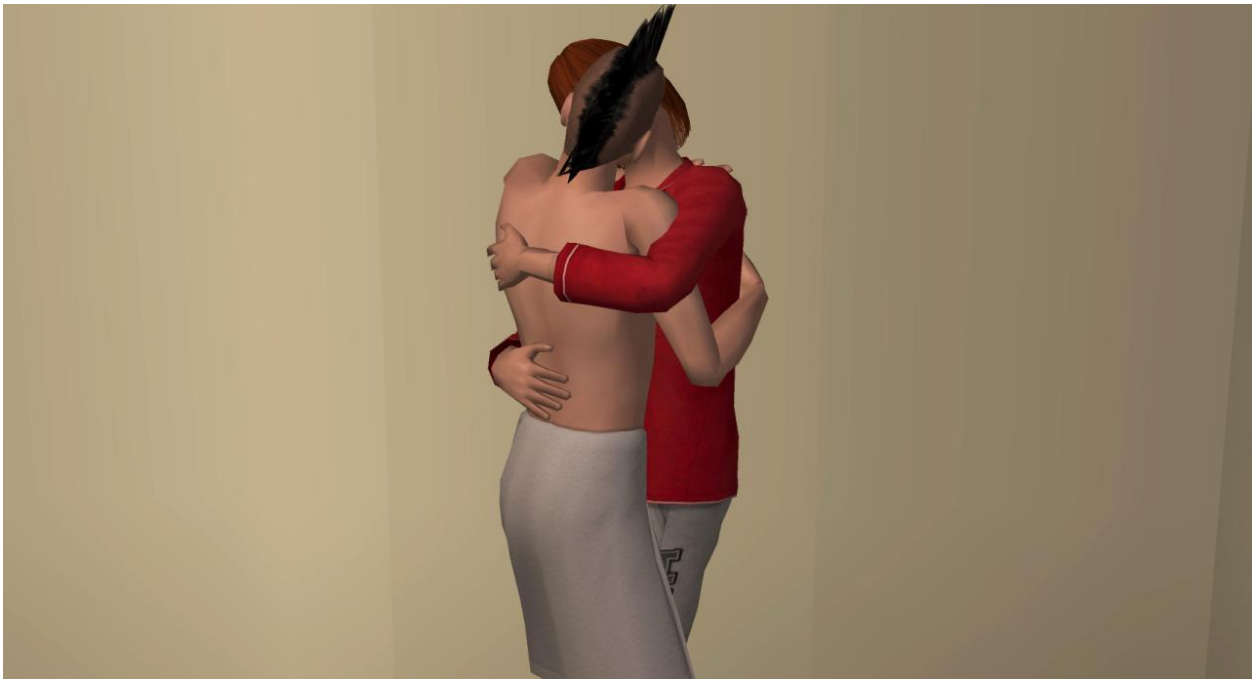


Chester
Chester takes one last and closer look at the giant stone archway, and even with his limited knowledge of ancient glyphic languages, is able to ascertain immediately that the highly complex writings are of no language ever seen before. Chester hurries back to civilization and informs the institute's archeologists that he has found the remains of what appears to be an "Alien" civilization. He takes the pack of scientists, each one giddier than the next, to the site, and it is immediately clear to them that Chester's discovery may be one of the most important findings in the modern era. The Archeologists confer and ask him to supervise further investigations into the Alien ruins, promoting Chester to Project Leader.
OK

yep

Got a letter from Nervous!

He invited him over and they got to the couch immediately.



He is staying over.

It's snowing and a burgler!

There goes the couch

Luckily Chester has a cellphone so he was able to call the cops fast!

And there goes the TV

Chester doesn't look too bothered xD

Noo, the cop lost!

Yeah

He didn't even got money from insurance it's just gone

We are ending this round here as it is winter now. It started to snow in downtown first it seems! I would have liked to get Nervous to move in here but Chester is nowhere near there, yet.
